EDUCATION

University of Porto

Masters of Science, Informatics and Computing Engineering

Porto, Portugal

Sep 2025 – Jul 2027

University of Porto

Bachelor of Science, Informatics and Computing Engineering

Porto, Portugal

Sep 2022 – Jul 2025

- **Relevant Coursework:** Computers Networks, Distributed Systems, Databases, Operating Systems, Algorithms and Data Structures, Software Engineering, Web Development, Object-Oriented Programming
- **Grade:** 17/20

EXPERIENCE

Software Engineer Intern

Jul 2026 – Sep 2026

Cloudflare

Porto, Portugal

- Designed and shipped a distributed concurrency-control system for a large-scale workflow-execution platform, capping parallel work across a job and its steps and enforcing limits consistently across every running instance, not per node.
- Added user-facing observability so customers can see why work is queued and the impact of tuning limits, exposing new metrics through a public query API.

Backend Engineer Intern

Sep 2025 – Jun 2026

Blip.pt

Porto, Portugal

- Backend development in the BETa program, supporting Sportsbook teams to ship faster on distributed, high-traffic betting systems.
- Contributed to a large, well-established codebase, working through the complex engineering processes of a large-scale company.

DevOps Engineer Intern

Jun 2025 – Sep 2025

Uphold

Porto, Portugal

- Automated infrastructure provisioning with Terraform and Ansible, cutting out manual instance updates.
- Deployed the AWX platform on Kubernetes and integrated it with Teleport for secure EC2 operations.

Head of Projects

Sep 2024 – Apr 2025

NIAEFEUP

Porto, Portugal

- Co-led the projects office overseeing 4 development teams building apps students rely on daily.
- Lead developer on the student association website (React, Next.js, PostgreSQL).

Teacher Assistant

Mar 2023 – Jun 2025

FEUP

Porto, Portugal

- Assisted in Discrete Math and a Computer Laboratory course (C drivers in MINIX), supporting 30+ students per semester.
- Ran in-class and one-on-one tutoring sessions that helped students prepare for exams.

PROJECTS

niployments

- Helped modernize the infrastructure hosting NIAEFEUP's apps, picking up Kubernetes, Docker and Ansible along the way.
- Built CI/CD workflows that kept ~4 core applications more reliably available. [repo](#)

pstr

- Built a regex engine from scratch in Go and wired it into my [personal website](#).
- Wrote unit and integration tests covering the engine's behavior.

SKILLS

Languages: Java, Go, Python, Typescript/Javascript, SQL, C/C++, Bash

Frameworks & Technologies: Spring Boot, Next.js, React, Kafka, Apache Storm, PostgreSQL, GraphQL

Tools & Platforms: AWS, Kubernetes, Docker, Terraform, Ansible, Teleport, Git, Linux, Grafana

Concepts: Distributed Systems, CI/CD, Microservices, Message Queues, REST APIs
